

# Section Macro

Used with the Column macro to define columns on a page. See [Working with page layouts and columns and sections](#).

## Wiki markup example

This example is useful when you want to add a macro outside the editor, for example as custom content in the sidebar, header or footer of a space.

**Macro name:** section

**Macro body:** Rich text, consisting of one or more Column macros.

```
{section:border=true}
{column:width=100px}
This is the content of *column 1*.
{column}
{column}
This is the content of *column 2*.
{column}
{section}
```
