

GreenHopper Documentation

GreenHopper 4.3.x

User's Guide

The [GreenHopper User's Guide](#) is for project managers, developers, testers – anyone who uses GreenHopper. New to GreenHopper? Learn about the [Planning Board](#), [Task Board](#), [Chart Board](#) and [Released Board](#). Try [creating some issues](#), then [ranking](#), [flagging](#) and [scheduling/assigning](#) them.

Administrator's Guide

The [GreenHopper Administrator's Guide](#) is for people with GreenHopper administration rights. It will help you configure [global GreenHopper settings](#), such as [restricting GreenHopper to specific projects](#), [registering listeners and services](#), and [setting global defaults for project settings](#). This guide also contains instructions on [configuring project-level settings in GreenHopper](#), including [card templates](#), [task board settings](#) and [general project settings](#). You may also find the [Knowledge Base](#) and [Atlassian Answers for GreenHopper](#) useful.

Installation Guide

The [GreenHopper Installation Guide](#) is for people who are installing GreenHopper for the first time. Check the [supported platforms](#), then [download](#) and [install GreenHopper](#). Where to next? The [GreenHopper 101](#) will help you get started. If you are using other Atlassian products, take a look at the [Integration Guide](#).

Upgrade Guide

The [GreenHopper Upgrade Guide](#) is for people who are upgrading their instance of GreenHopper. Start by reading the [latest Release Notes](#) and [version-specific Upgrade Guide](#) for the version to which you are upgrading, then [download GreenHopper](#) and follow the [main Upgrade Guide](#).
